## Life Center

### Greetings from Timisoara, Romania!

Thanks for praying for us and keeping us in you heart, we really need your love and support, specially at the end part of this year! Let's finish strong!

**A representation of CCFR ministries is about all what we are doing.**

Here I would love to send you a special report about Life Center in Timisoara. Today this ministry represents the overall ministry of what has been done, and what we're still doing in Romania. It is connected to Life in the Spirit of growth to maturity.

This younger generation had been raised from a child to maturity. They practice abundant life that is love for our neighbor. This same principal is happening for the new disciples leader who are growing up. This new breed of pastors and leaders are growing to maturity but still need our help. All of them are still needing the touching care of us as we're representing Christ walking on the earth, to encourage, teach, help and support, and our finances.

### **The Life Center is a perfect presentation of the overall ministries in Romania**

Here are the reports about this ministry from director Constantin Prisacaru, and his assistant Gelu Golea.

The Life Center ministry houses and trains up at least 41 young men and women in their later teenage years. We launch them into their adult full age maturity. The real number reaches to over 50 who are receiving daily assistance of food, cloth, shoes, and counseling. Most of these non residents have graduated from Life Center, while others receive help because they are in grave need of it. Daily a couple of graduated guests visit with us, and fellowships with us over a lunch or dinner. Life Center also provides wonderful student facilities for classrooms, fitness areas, table tennis and body building. Additionally we offering counseling, fellowship and Bible Studies, musical and singing classes, praise and worship fellowship times.

Lately, we had been blessed to have John Dolinschi teaching a class on *knowing the voice of God* and following His prescribed life destiny for us.

### **The regular caregiver work we do for our Life Center**

During November and December, some former students will help the new ones get oriented with Life Center's standard statues and rules. They will be working in order to keep our home in good shape, both inside and out. Their own rooms, kitchen and classrooms must be kept clean and looking neat.

They will learn to keep up with the timely schedule, like meals time, chapel service, and other added programs and outreaches. They will be feeding the homeless, ministering in prisons, evangelism, church planting, and more. We follow up with their schools and universities attendance and keeping a timely program for their homework studies and everything else required of them. We also evaluate the student's grade level, and help those who are behind the average standard.

**Today we feature Felicia Dumitras.** We helped her from the beginning until she graduated from the Education Academical College and at the same time graduated from Life Center over a year ago. Felicia is from a very large and

poor family, from the unprivileged broken area of Romania. But today she works a very well paid teacher's job she really loves. She is involved in teaching at Gate Church in Timisoara. Here she met George a wonderful man of God, and she married her lover on September 22, 2019

### Testimony of God's reaching grace using you and us to shape the lives of people

My name is Elisabeta Dunareanu, I'm coming from a family with nine children, I'm the fifth one born in the family. I'm in my second year studying at the Medical School of Timisoara. Before I came to the Life Center, ahead of me were my two brothers. They told me great life stories and beautiful experiences encountered in this godly life home. My brothers spoke highly to our parents that Life Center was their second family home. They felt the great parental care for each child. When I heard all what they described I really desired to become a member of this family too. I applied to be accepted and the center staff knowing already our home situation and my brothers who left behind their positive testimonial, took this in consideration and I was accepted into this wonderful life program.

Though, it requires a lot more of my time, in addition to my medical schooling, Life center became the life and ministry training for me. This program keep me very busy, but I'm very satisfied and happy to be highly disciplined and actively involved in a life ministry. Moreover, here at the Life Center, we're able to facilitate the best quality homework studies. We are supporting one another, in this best tranquil conditions, a lot better than even in our own little family homes.

I'm part of Life Center ministry team of reaching the small village churches, providing peaching, teaching and singing for these new church believers and church plants around Timisoara.

This is what I already had been doing before coming to Timisoara, we reached out to church plants started by our pastors who are backed up by the pastoral fellowship ministry of Pastor John Dolinschi. Pastor John had envision church plants around Romania, and discipling schools to raise new leaders in the ministry. As in our spiritual deserted areas, few believers are around and we are lacking preachers and leaders to go on the harvesting outreaches.

My parents hardly raised us up and only by God's grateful provision we made fine. Really, it was impossible for our parents to support us to study further than around our home. Timisoara or Bucharest is very expensive. Today my father is retired receiving a very small pension, and my mother is a housewife who cares for each of her children. They struggle keeping all of us well and in school, assisting us with our school homework. Thanks God, for the Life Center ministry that really has shaped our future lives and carriers. Without it many of us would have given up on any higher studies. We would be working quick jobs just to produce quick and little money. Thanks for all those who supports us in Romania, love you my brothers and sisters from afar.

Elizabeta,

### Life Center project

Our Heating Boiler is very old, inefficient and unsafe. We need a new boiler heating system that saves gas and will function well over the freezing winter days. We need about \$3000 to buy a new heating system.

### Christmas Shoes Project Knocks at the Door

The next huge project is new shoes for the poorest kids. We have behind us lots of

years of blessing these kids. Thousands of them were blessed with shoes, including Elizabeth and Felicia who were given shoes while little girls and because of our help, today they became teachers and doctors. These are just two testimonies, a rehearsal for the thousands who are standing behind them. Thanks for your obedience to the Holy Spirit voice!

### Book writing Project

Since September I have taken lots of my time, deprived me of breaks and working overnights just to make the book I am writing possible. I was overwhelmed by the history and the miracles of God encountered in each step of the way. Really, I was awe-stricken of His grate never ending love. How could I not write this story and these unbelievable testimonies down for you. I always told myself that heaven will tell it all, let me stay silently behind the scenes, but the Holy Spirit came to me and said; Let my people be encouraged by them while they still are walking on this earth. John, go and tell them.

However, this took me away from writing to you my regular prayer cards. My general communication and visiting with you was down, and this was counted in support too. We are really needing your assistance, besides prayer and good wishes, please support the regular and the ministry projects, but specially this project as it will bless you mightily. When freshly printed we'll mail a book to each supporter.

In the meantime we need your help. We are new to book publishing, you may know a publisher who does this gracefully low priced.

Thanks for siding with us and backing us up,

*John & Viorica Dolinschi*
